DIAMOND INVESTMENT OFFER

ABOUT THE COMPANY

Wonder Invest International Group specializes in investments in the rough and polished diamonds

Our experience in material selection and gem cutting and the company's presence on the international stock exchanges allowed to step over the line of the classic perception of gems as jewelry.

Today **Wonder Invest** approach is that rough and polished diamonds are assets attractive to investment, and they require their own management. In this case Wonder Invest activity is to provide a full service with rough and polished diamonds from the analysis of the market situation, choose the most liquid rough diamond and its cutting to the actual transaction and the subsequent management of the acquired assets.

Wonder Invest international group specializes in investments in grade-diamonds and diamond rough. Our vast experience and direct access to international markets allow transcending the traditional 'gemstones as jewelry pieces' approach. We are experts at creating investment portfolios and managing assets. We offer a broad range of services from market analysis to asset selection, acquisition and management.

Wonder Invest relies upon the capabilities of "Zvezdochka" (<http://stardiamond.ru>), a leading Russian diamond manufacturer that purchases diamond rough from Gokhran and ALROSA. This allows for incredible synergy and dynamic growth potential resulting in lucrative investment offers aimed at saving as well as increasing capital.

We know how to make diamonds reliable assets in any investor's portfolio

Years of experience, in-depth market knowledge, clear and streamlined interaction process with largest marketplaces (Shanghai Diamond Exchange, Israel Diamond Exchange), partner broker and trading companies availability mean that we have every necessary tool at our disposal.

Wonder Invest customers get all the new and effective instruments on the diamond market

Our clients get access to all the tools available to us. We know how to incorporate diamond assets in any portfolio and utilize them to maximum efficiency.

3 BASIC OFFERS FROM WONDER INVEST

DIAMONDS AS AN INVESTMENT INSTRUMENT

Sources: Bloomberg, Rapaport, IDEX, Equity Communications

Why do diamonds complement any investment portfolio perfectly?

Diamond demand and prices are growing. Profitability of big high-quality colored diamonds is around 5-18% per annum which exceeds MMVB index, bonds, real estate, mutual investment funds, deposits, art and many shares.

COMMENTS

-  Investment-grade diamond prices have increased at a rate of about **9% per annum over the last 10 years**
-  Diamond prices grew faster than MMVB index, bonds, real estate, mutual investment funds, deposits, art and many shares.
-  Price of diamonds didn't fall during crisis unlike the stock market and most other assets.
-  Diamond prices were ahead of shares, real estate, gold, mutual investment funds, deposits and art after the crisis
-  Diamonds are among few commodities to boast a positive **investment trend, preserve capital** during financially turbulent times and growth during recovery
-  Prices for big colored high quality diamonds never drop.

ARGUMENTS FOR A NEW INVESTMENT INSTRUMENT

Mainstream investment instruments have discredited themselves in the past decade

Instability of global financial markets brought the need for a more reliable asset capable of withstanding destructive external influences and increasing its value.

“Guaranteed investments” are not deemed trustworthy anymore by most market players. Popular investment instruments have discredited themselves.

Preservation and augmentation motivation shifted focus towards a more conservative segment – gemstones, namely diamonds and diamond raw

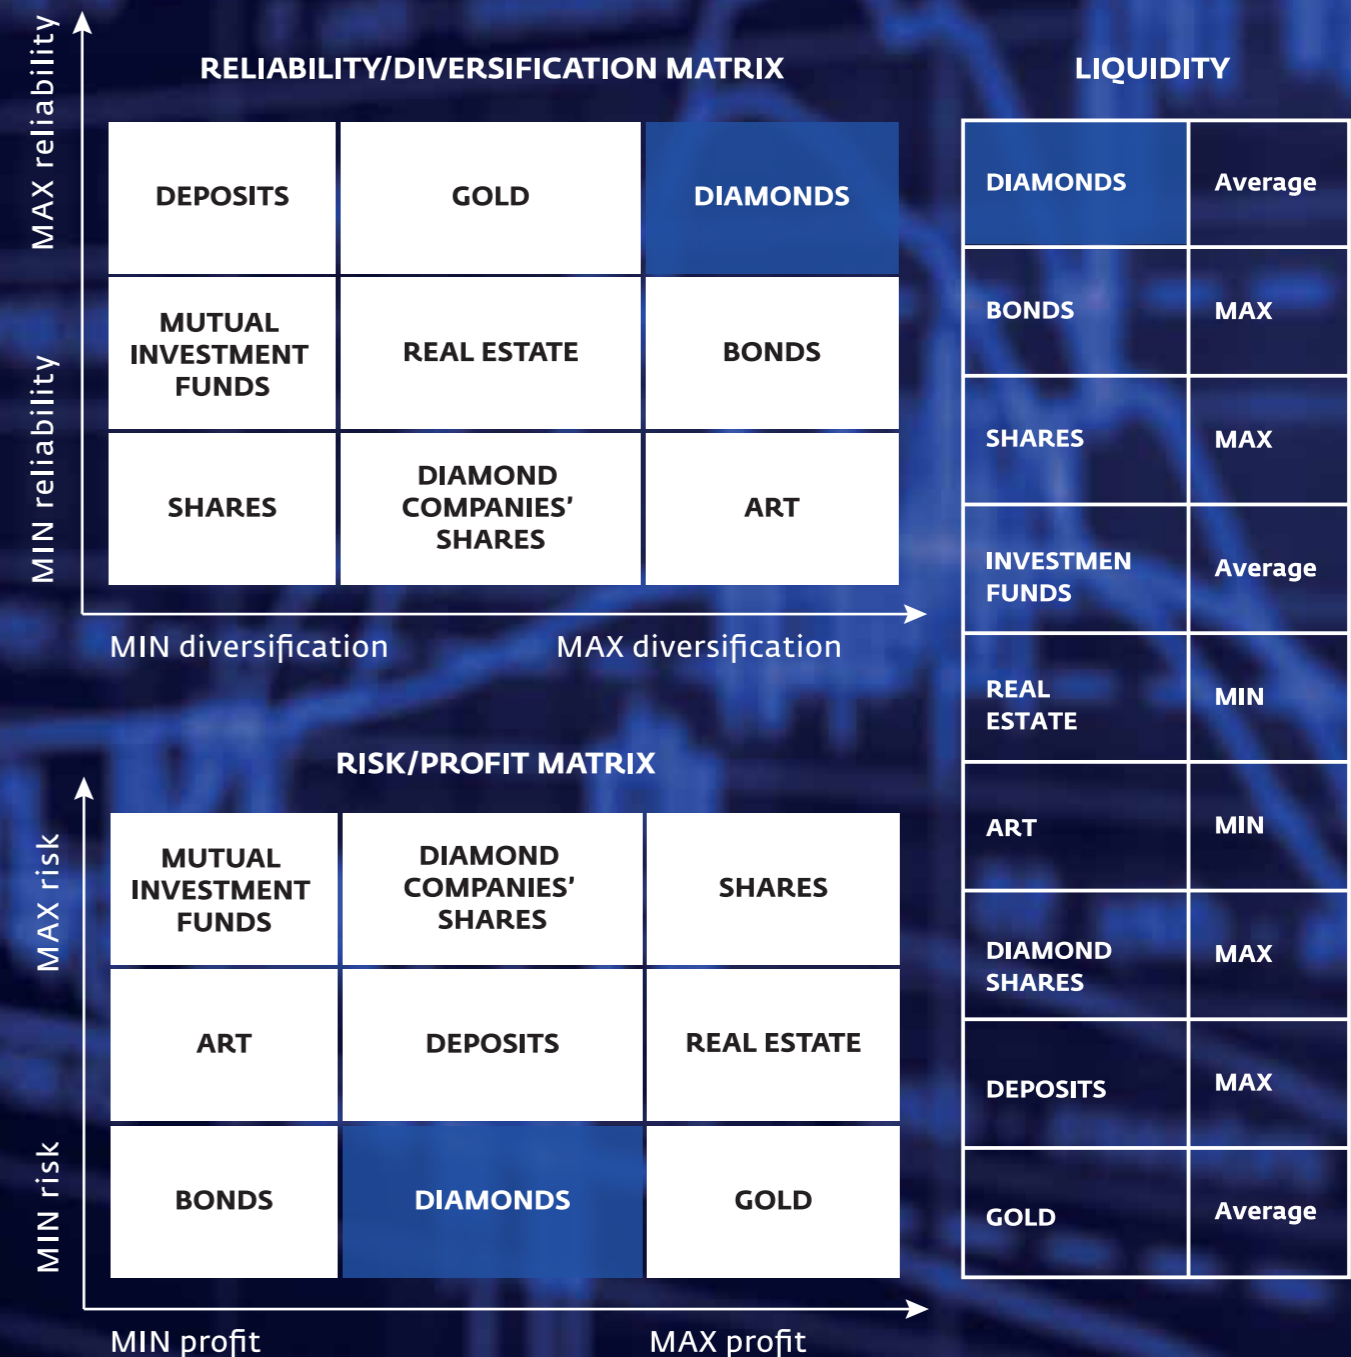

A diamond unlike other assets always has value which **is reinforced by demand** on global diamond market.

Diamond is a physical object hence it provides safety, reliability and emotional attachment to the owner.

A significant decrease of diamond supply due to key locations being mined out by 2030 gives investors extra confidence to base their strategies around growth of diamond prices.

Diamonds as investment:

MAXIMUM STABILITY AND DIVERSIFICATION, AVERAGE LIQUIDITY, MINIMAL RISK

ADVANTAGES OF DIAMOND INVESTMENTS

What makes diamonds
welcome assets
in investors' portfolios?

RELIABILITY

Protection from market volatility, financial institutions' bankruptcy, market collapses, financial reforms. No rapid price fluctuations. No dependence from financial speculation, economic or political reforms within any given country.

CONFIDENTIALITY/ ANONYMITY

Investor does not register an the government does not have access to the data. Diamonds are not subject to tax declaration, easy to own, no complicated ownership documentation.

CONTROL

Investment in real physical asset that is under investor's complete control

RELIABLE PROFIT

Diamond consumption is increasing as mining locations decrease. Rare diamonds make up 2% of the total volume and their prices increase at least by 7% per annum

STATUS

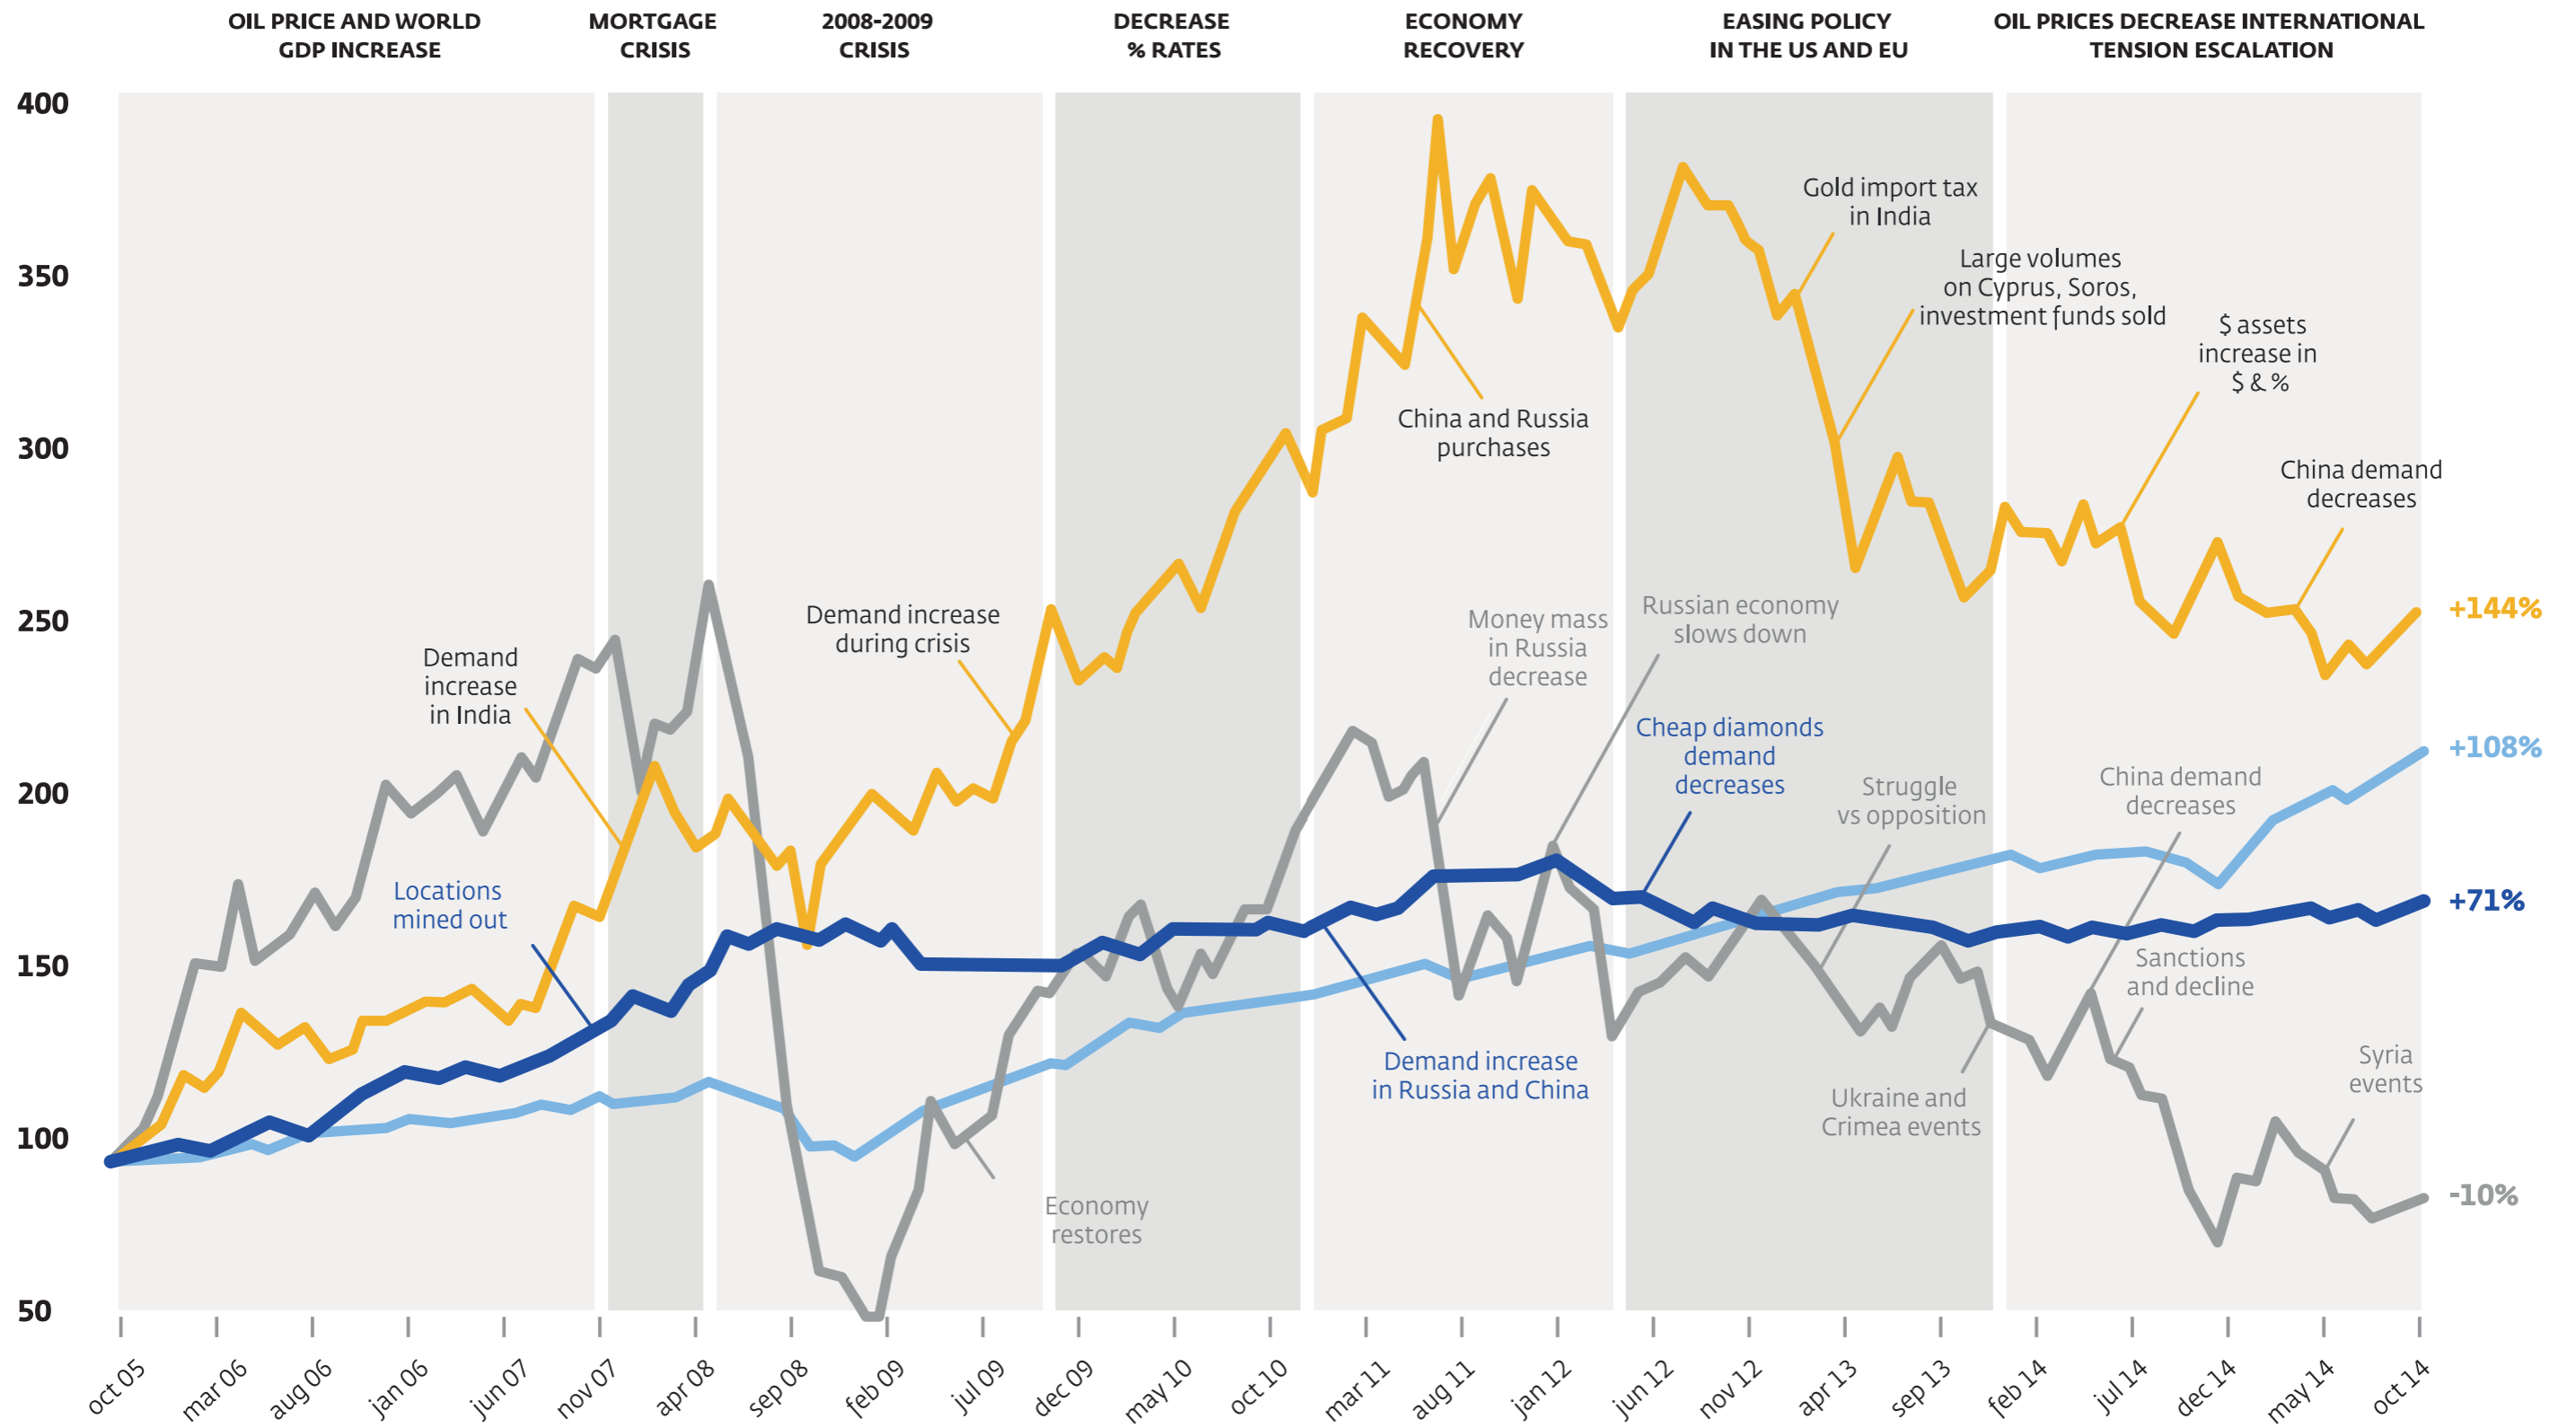

Diamonds are investments that can become part of a piece of jewelry. Unlike other luxury goods their value constantly increases over time.

MOBILITY

Diamonds are subject to personal use. Easy to transport across borders. Convertible in financial centers worldwide. Accumulates a fortune inside a small physical volume.

DIAMOND MARKET STRUCTURE

How does the international diamond market work?

International gemstones market is a closed and streamlined system with **stable regulated prices** that function in accordance with internally set rules for over 100 years.

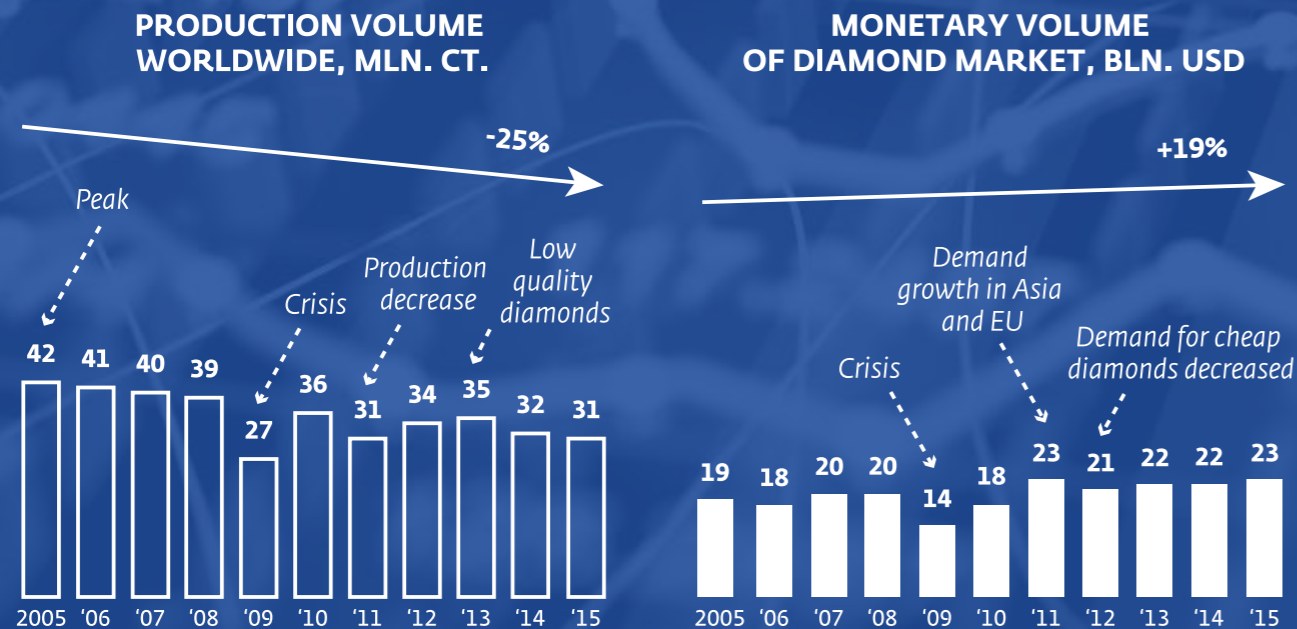

Pricing chains have been in place for years, exclude the possibility of financial speculation and are self-regulated. This prevents significant price fluctuations even when the market is not doing well or demand is on the decline.

Corporations in the diamond industry employ ventilation strategy to control supply and demand. This keeps the market evenly saturated with diamonds and diamond raw at all times.

THE INTERNATIONAL DIAMOND MARKET

Diamond manufacturing has decreased by 25% worldwide over the last 10 years to 31 mln ct. Monetary volume of the market has increased by 19% to about 23 bln \$ over the same period.

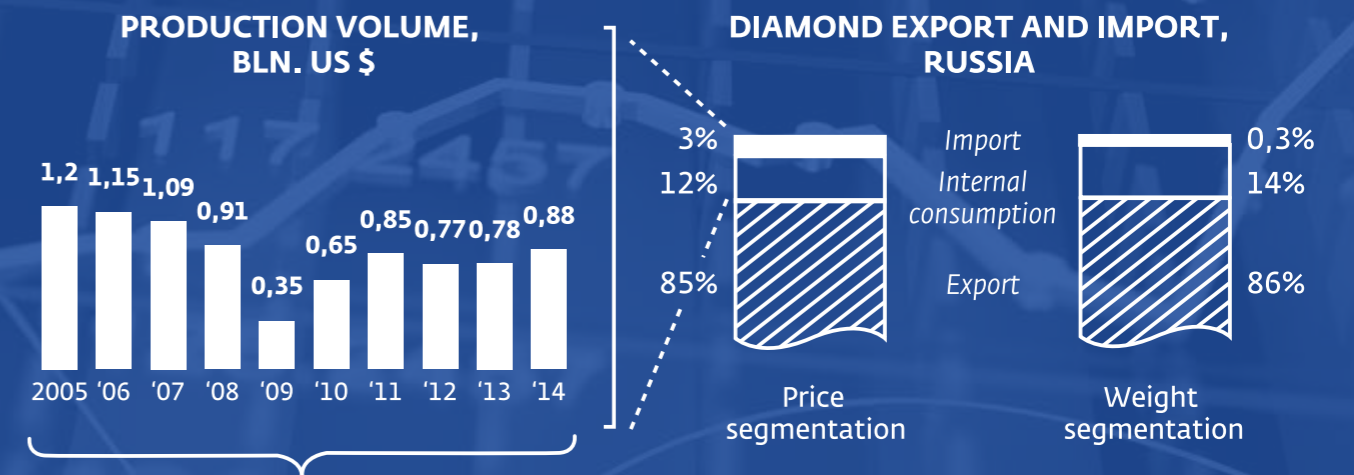

Another factor for increased attractiveness of investment is the decrease of the market. Production peaked in 2005 and has been on the decline since. Production decreased by 30% over the last 10 years. Monetary volume has increased by 10% over the last 10 years to 14 bln \$.

RUSSIAN DIAMOND MARKET

Russia consumes more diamonds than produces. Cutting segment has growth potential

RUSSIAN DIAMONDS IN RUSSIAN JEWELRY

COMMENTS

Russian market has **great growth potential**.

Diamond raw export makes up 87% of the market. Only 13% is cut internally (about 300 mln. USD).

Russia imports low quality diamonds from India worth at least 100 mln. USD.

Quality diamonds volume is very low on Russian market and out of touch with worldwide prices. This is due to low volume of cutting and polishing industry and high import tariffs.

This scares off foreign participants and restrains local players' development.

Most of jewelry market turnover is spread among large network vendors that artificially inflate prices.

WHY DIAMONDS ARE NOT CONVENTIONAL INVESTMENT

Diamonds have undeniable investment potential

Lack of resources, increased demand, instability on financial markets contribute to the conclusion that diamonds have **investment potential**.

Despite the abovementioned facts diamonds are still not considered conventional investment instruments.

Few professional market Participants have access to full knowledge of the market because of its conservatism and closed nature. Investors are put in a losing situation without that knowledge. This allows for diamond portfolio speculation. This is why diamonds do not make it into a standard investment portfolio.

Financial investment consultants are incapable of uncovering all the intricacies of pricing and liquidity without a professional market participant's assistance.

KEY FACTORS KEEPING DIAMONDS FROM BECOMING AN INVESTMENT TOOL:

- Diamond market setup and unclear pricing mechanisms
- Liquidity can be an issue
- Diamond heterogeneity as an investment tool

KEY FACTORS INCREASING ATTRACTIVENESS OF DIAMONDS AS AN INVESTMENT TOOL

QUALITY CERTIFICATION

- ✓ Quality certification allows for quick and easy diamond grading and market evaluation
- ✓ There are few organizations that enjoy worldwide reputation as trustworthy expertise providers. Among those the GIA (Gemological Institute of America) stands out. GIA certificates are given the highest credit when evaluating diamonds. Rapaport Diamond Report and the largest market in the world – the USA market – employ GIA certificates.

ASSET SALE AND LIQUIDITY

4 ways to sell diamond assets:

WORLDWIDE EXCHANGES

AUCTIONS

RETAIL

PRIVATE DEALS

The growth of online technology brought about a significant change towards clarity and better/cheaper information on the diamond market.

IDEX Online platform is a good example of this. It reflects the supply and demand levels for over 700 000 diamonds worth over 6 bln \$.

Singapore Diamond Investment Exchange, SDiX launched in September 2015. It reflects real-time diamond prices and allows for trading.

These changes made diamonds more attractive to investors. For years to come these processes will work towards further clarity and convenience of operation for professional investors.

Several investment players emerged on the USA market over the last 3 years. They specialize in diamond investments and their trust funds have already attracted over 5 bln \$ from private investors.

DIAMOND INVESTMENTS WITH WONDER INVEST

WONDER INVEST'S investment offers are based on thorough analysis within an investment strategy.

Only a team made up of financial professionals and world class diamond experts is capable of turning diamonds into an **investment product**. The investment should be under investor's control as much as possible. **Wonder invest** focuses on constantly supplying the investor with all relevant information and current market disposition.

Wonder Invest's integration into the market means pricing expertise, in-depth market understanding, knowledge of key players, dealers and manufacturers. All of these make for the best investment offers possible.
